

Downloading the AWARE App

Mobile Set-up

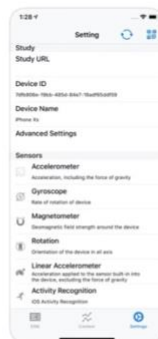

This document contains instructions on iPhone and Android installation of the AWARE App.

For iPhone users:

1. Make sure you have an Apple ID set up. If you don't already, you can follow the instructions here: <https://support.apple.com/en-us/HT204316>
2. Navigate to the App Store on your device

3. Look for the search bar at the top of the page. Type in "Aware" and scroll to the "AWARE Client V2" app

4. Click on the “Get” button, and confirm your Apple ID credentials if prompted.

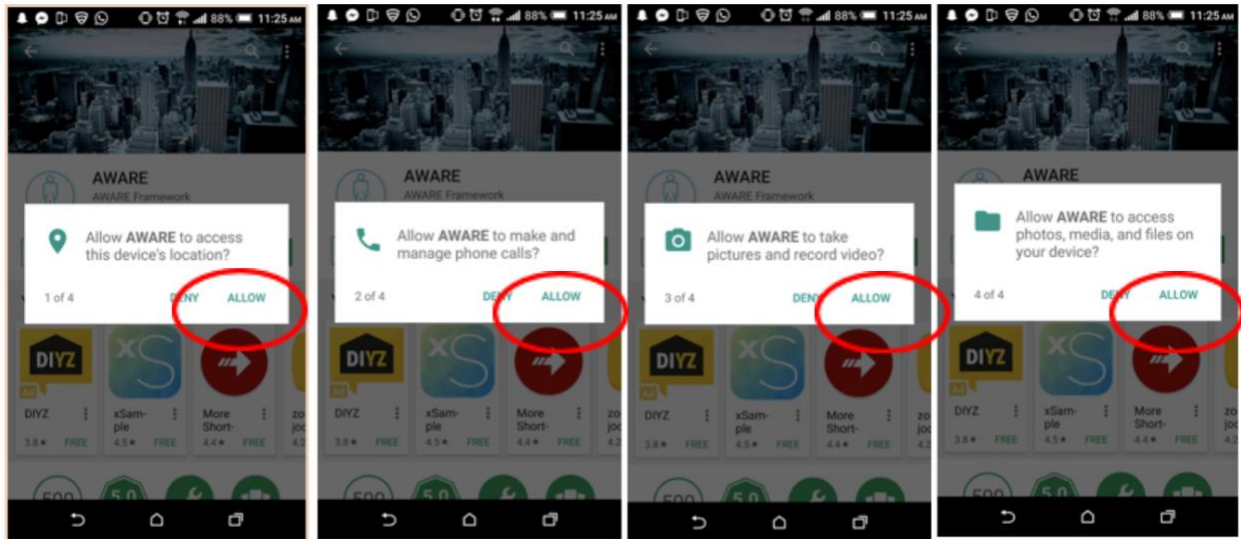

GET

5. The app should now start to download on your phone. Once the download is complete, open the app – you will receive some prompts asking whether the app can track your location – select “Always allow”.
6. You will also receive a prompt asking whether the app can send you notifications – select “Allow”.
7. Once this is complete, you should be ready to sign up for the study!

For Android Users:

Please note that AWARE cannot be installed from the Google Play Store, so you will need to use the link below to download the app.

1. Download the AWARE app from the link below on your phone:
<http://wwbp.org/pennlinc/>
2. Open and install the AWARE App
3. When you open the file you just downloaded, you may see a message that your phone isn’t allowed to install unknown apps from this source. If so:
 - Please select Settings.
 - Enable “Allow from this source”
4. Install AWARE by clicking “INSTALL”
5. Open the AWARE app after installation is complete
6. Enable all permissions (press “Allow”) as the messages appear

7. Once this is complete, you should be ready to sign up for the study!
